-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 1/8/04.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☐ Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Vuillemot 3,884,055 in view of Hillabush et al 6,467,317, Hurst 6,427,496 and either Harris 4,577,884 or Mamo 3,391,555. Vuillemot teaches a trailer hitch lock device for a ball type hitch comprising a base member 16 having an upwardly extending central mounting pedestal 18 affixed thereto and two side margins, a first side plate 22 with a hole 26 for a locking pin, a second side plate 24 with a hole 28 for a locking pin, and a locking pin 20 with an apertured flat tang 31 at the end thereof to receive a conventional padlock 32. Vuillemot fails to teach a countersink or recessed margin in the first side plate hole 22/26 to receive the head of the locking pin and a lock collar to surround the padlock and a lock shield for the locking pin. Hillabush et al clearly teach the advantage of providing a lock collar 100 around a conventional padlock to prevent tampering therewith. Hurst clearly teaches the advantage of providing a countersunk hole for a locking pin head in order to prevent tampering therewith. And both Harris and Mamo teach an arching lock shield (19; 16 respectively) mounted between the first and second side plates and over the locking pin (20; 8) to prevent tampering with the locking pin. It

Art Unit: 3676

would have been obvious to one of ordinary skill in the art to provide the lock device of Vuillemot with the various well known anti-tamper features as taught by Hillabush et al, Hurst and Harris or Mamo in order to enhance the security of the locking device.

3. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Niswanger D436,064 or Vuillemot 3,884,055 in view of Hillabush et al 6,467,317, Hurst 6,427,496 and Harris 4,577,884. Harris teaches a lock shield 19 attached at both side portions 18 and arching over the lock pin 20. It would have been obvious to one of ordinary skill in the art to modify the lock of either Niswanger or Vuillemot to have a shield for the lock pin as taught by Harris in order to prevent tampering with the lock pin.

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over ? in view of Fazzolari et al 4,616,493. Fazzolari et al teach the use of a roll pin 38 within a lock spindle as an anti-drill or anti-saw feature. It would have been obvious to modify the lock pin of ? to have such a roll pin as taught by Fazzolari et al as an obvious matter of design choice in enhancing the security of the lock device by preventing drilling or sawing of the lock pin.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note the cited trailer hitch locks, especially D436,064 to Niswanger, Lopez et al '570, Brown '337 Niswanger '961, Ponder '841.
